13 - Do you have any other recommendations?

Return Rate 4/15 (26.67%)

- The teacher of this class expects students to understand difficult material that has never been taught or instructed. The teacher grades with an unrelenting iron fist. He is unfair and asks much more of the students than he ask of himself.

- this professor is killer, he hates someone asks him twice, he teaches so fast that he thinks everyone is genius in Microsoft Excel like him, he explains stuff once and thats it, if u ask him twice or ask same question he gets mad and u really don't want to learn and ask him anything to not to get mad at you and makes you feel bad in front of the students, he is not fair in grading, he doesn't let people get good grade, its either you do something amazing or you are failing, my classmates and i started to meet for long time after class to teach each other! we all suffering from him, instead of trying to get A, we r trying to pass this class! he disappointed us he makes us feel stupid, everyone is suffering from him and talking bad about him no one loves him, he is just stupid! if no one is doing something with this i will sue him and my embassy will take care of that!

- the workload was uneven. Gives the option to "fire" a member of your group if they are not doing the work only to see that more work is given with out grading it different. Very hard grader. Doesn't make sense to give 3 finals in a 7 week class on the basics. Instructions were always confusing and gets frustrated easily. Students asked stupid questions because they're foreign students who barely know how to use word document let alone excel or capsim which tested his patience many times. Either this class was too hard or every other class is too easy. not sure what else to compare it to. Just be a bit nicer, we don't want to be there either.

- The course was very intensive, it really gave me hard time specially that I had another class in the summer. And the proof that 2 students dropped by the 3rd week.

<p>- I will admit that prior to taking this class, I was informed of the difficulty of the class and the high expectations of the professor. However, I am surprised that what I had heard is different than what I experienced. I'm not sure if it's due to a change in the professor's class structure, but whatever it was, I'm thankful I didn't experience what others students did.</p>

<p>- It would be nice to have been given a brief overview of Microsoft Office because I know there must be a million things I haven't learned about the programs that Dr. Garrett is aware of.</p> <p>- I don't think I will get an A in this class, but I am sure 100% that I have learned a lot. I have learned something that would help me in my career, in my business and my future. I can say this is the best class that I have ever had since I attended to Woodbury University in 2012. I am really happy that I took this class with Dr. Garrett</p>
