Course was great! Probably the most valuable class of this semester! I learned a lot!

Learned the most in this class out of all my courses this semester.

---

Get rid of the myItLab program. While others may have felt that they learned from it, which to some degree is true, I felt that I learned more when the professor taught word and excel. The program overall was very glitchy and overall I felt it was an unnecessary part of the course. Everything else was a learning experience.

in general, it is good. I believe the word and excel are too difficult.

The instructor is great. The coursework is a bit challenging but I guess that's a good thing.

I would have liked to have done the word/excel work in class rather than on myitlab. The program made things more confusing than they should be.

myitlab.com is not to compatible with Mac's, its very frustrating. Also, the word and excel assignments are not to helpful.

Thank you professor Garrett for excellent course, full of knowledge.

Keep up the great work. I'm a junior now and only feel like I've had a handful of classes where I've gotten my moneys worth. Tuition well spent.

Align the presentation topics to topics being discussed in class that week or the week before. It will help students absorb the subject even more, and help presenters in doing their papers because then they will have some basic knowledge of the topic they need to talk about and not need to constantly ask the professor for help.

Ilove this class~~

Be more one on one with students.

The televisions that are being installed in class should be replaced with bigger screens or just removed completely because it becomes difficult to see the material in the television. Great class! I really enjoyed learning, but the work load was extremely heavy. The presentations that we have to do in class are really nerve racking.

Teacher is amazing, but I feel like the class is only taken by students out of force. Out of the 16 people in our class, 13 of them are just hurrying to get up and get out. This class would be a much better experience if everyone in the class was preparing for a career in IT. Just my two cents.

It seems a bit unbalanced that some students don't get to present until we are way into the course while other students have very little time to prepare as the first presentation is given by the third class. One student for some reason didn't present at all as assigned and was given additional time by the instructor to present at a later time. The rest of the students had to present twice in the course and the instructor was very specific about not presenting two weeks in a row.
