This was the first time I felt class was interesting. It was very applicable to my life even though I am not a "techy" person.

Pretty good class, Mr. Garrett clearly knows what hes lecturing on. The materials for class readings were relevant and tied in well with the course work of the class. Overall a good class and good experince.

I think overall the course was very interesting and helpful I feel like I learned a lot in this class. The instructor is awesome, the class sessions are interactive and full of enthusiasm. I would definitely recommend the instructor to other students.

This is a great course!

The instructor was very descriptive and have a great teaching style. He engaged all of his students to take part in class discussions, he encouraged his students to share ideas and ask questions.

Great class, unfortunately too short and there are no subsequent/advance courses of this decipline available to take. I would really like to take a follow-up course that digs deeper into backend system integration as a follow up to this course.
