2. I learned and now understand the course materials	1	0	3	5	5	3.92
Professor did his best to explain it well and if students still did not understand, he would do whatever it took to make sure we understood.						
It's great how the professor teaches the html, sql, and javascript. He should explain the sql the way that he explained it during his office hours.						
This class was great but the workload was too heavy. It took over half of all of my time studying. It was hard to the point in which I was close to giving up just because I really felt over my head a many times.						
3. Instructor has a genuine interest in individual students	0	0	0	3	11	4.78
He always made himself available to work with students						
amazing! he is always willing to help you out one on one for you to completely understand the material

10. Overall, this course is very good	1	0	1	2	10	4.42
Too much work for this class and not understanding why this is a REQUIRED course for ALL						
11. Overall, this instructor is very good	0	0	0	4	10	4.71
one of the best in Woodbury						
12 . The course workload is (1 = too easy, 3 = just right, 5 = too hard)	0	0	4	3	7	4.21
There's a lot to learn and a lot to do but so little time. Great class though.						

Great class, great professor. Learned so much in this class that I could walk out and use anytime. Enjoyed the class even though the work load may have been tough and heavy. Thanks for a great and challenging class.

Good class.

Dr. Garrett is a genuinely understanding and nice professor. He truly cares about helping his students out as much as he can. His office is open for students to ask questions.

The work is very difficult and I feel like if little things were cut out-such as some of the in class quizzes were supplemented with the online classes or if some of the projects were minimized and fewer requirements such as lynda.com requiring 8 hours versus 15 or, the html sites not including so many different redos. I just felt like we were focused on so many things it was hard to focus on 1 thing. Or if we dedicated a straight month to the websites and got them over with. We could be more focus and things would be a lot less confusing.

I disagree with students having to learn major functions of information systems in such a short time. Many firelds will NEVER use these concepts.

This class was so difficult that even if it was the only class that I took over the course of a semester that I still would have struggled with it.

If 7week student wouldnt have taken a picture of final exam, there would have been no issues

When I asked Dr. Garrett if he had a diagram of a content management system in class he went out of his way to create a youtube presentation on how the system works. I was very impressed that he took the time out of his busy schedule to do that for the class. Dr. Garrett clearly cares about his students and will take the extra time to explain the course material in a understandable manner.

I really liked Dr. Garrett's teaching methods. He presented complex concepts in a variety of ways to enable learning, engaged the class well, gave appropriate and meaningful assignments, with good feedback tailored to our individual areas of need. I can't believe how many new things I learned in this course.

Probably a mini group project that involves interaction between management and IT of a mock company

I think that Dr. Garrett is a very good professor that has genuine interest in the students. His course related the material to actual current events and business tools.

Interesting class , good/knowledgeable professor ... way too much work associated with ONE class.
 *Nathan is too focused on his point system of grading.(get what you get). Class is setup where assignments appear threatening and if you fumble on anything you are penalized. I would recommend coming down on the work load and the severity of the grade points for hmwk/quiz/projects .
