- Wish we had more professors like Prof. Garrett. I was lucky enough to take two amazing professors this semester him being one of them. They should be praised because they are so valuable to this university they would be at a tremendous disadvantage without educators like them.

- Dr. Garrett is by far one of the best instructors I have encountered throughout my coursework here at Woodbury. Left the course with valuable knowledge.

Return Rate	5/17 (29.41%)
<p>- Too much work for the final in this course, word and excel final should be separate with capsim final. So stressed taking all these together at one time.</p> <p>- I would suggest having a better guide for the Capsim program. I think a sample from a previous class with step by step instructions will really help next semester students understand the game better. Though I know it's difficult to cut out assignments from this course due to the value of everything we learn, I think it is needed. This class took up a lot of my time from my other classes. Nevertheless, it's a great class where we learned a lot of important things that I am today using at my current job. Our Professor did a great job in explaining, offering help and caring about the class.</p> <p>- I hope the school recognizes him for being such a great educator. I wish he taught more course because his knowledge and his teaching techniques are beyond amazing. Highly praise him. So glad i made the choice to take him instead of another professor for mgmt. 336 i would have missed on such important information.</p> <p>- Dr. Garrett is an amazing professor. He has taught me a lot of valuable things in both word and excel that I will use in my career.</p> <p>- Dr. Garrett always updated us on his office hours and had extended hours for students that needed the extra help. I have learned so much through this course and would love to take another course with Dr. Garrett. His extensive knowledge and passion in the subjects he teaches really shows through his enthusiasm during class.</p>

<p>- This course helped me to improve my abilities and to expand my knowledge on a different subjects such as power points, excel, reading a cases in a real world framework.</p> <p>- I really enjoyed this class but overall I feel like I just gained little information on a lot of topic. I believe some of your reading materials were really off-topic. I video game video and articles were interesting but really, what are we supposed to gain from indie video game developers. Well, we can take the positives; as now, we know the life of indie video game makers. I really like the video about Venture Capital. Overall this was a great class.</p>														

2 - I learned and now understand the course materials

- Again, whatever you taught in this class gave me an insight on various topic. Since, this class is an IT class i would have like this class to be more technical. I know you tried to mix marketing to this class, but I would have preferred more of the IT concepts like Database, CRM (you covered this in class but more depth would have been better). We already have a few marketing and management classes in this MBA program.

<p>- Substantial scholarships should be offered for ongoing MBA students</p> <p>- very good instructor thank you</p> <p>- Best course and excellent professor</p> <p>- In light of the MBA revamp, I would actually recommend this course be a part of the core courses, since the material that we learned is applicable to real life tasks.</p> <p>- I would like you to increase the presentation timing to more than 5 minutes. I believe it is hard to cram everything within that time frame. i saw some of the student didn't present for 4 minutes because they did not want to go over. If there is not time limit or say 7-10 minutes then students will not feel rushed and stumble while they present. And as one of the students mentioned, moving the presentation to the hall would be an awesome experience.</p> <p>Some of the topic i would like you to have covered are some advanced excel (what ever you taught were great for beginners for it not very challenging), database administration, SDLC. I would have preferred this class to focus strictly in IT because it is useful to all career types.</p>
